Musical Freestyles

Learning to Ride with Music is For EVERYONE!

“Riding to the Rhythm of Life” - is more than just a catch phrase. The basis of everything we do begins with rhythm - riding (*no matter what level or discipline*), music, dance, etc. For those of us who do dressage, the foundation of the training pyramid is Rhythm and Relaxation. However, oftentimes those fundamental elements are the first things to be lost. EquiChord has developed a process that can help riders improve their rhythm - and ultimately riding - by integrating music into their training regimen. For those who would ultimately wish to perform a Freestyle, the sooner you start developing this skill, the better. For those of you who would like a fun and relaxing tool to help your training, this is it.

Brought to you by the authors of Rhythm Riding

“...a comprehensive and highly detailed guide.”
 - Yankee Horse Pedlar

“.....This..book contains all you need to know if you re contemplating musical freestyle.”
 -PhelpsSport

“This book is a must have.....”
 -Horse Country

Who should attend?

- * Anyone desiring to improve riding through rhythm
- * Riders working on a Freestyle
- * Riders who would eventually like to develop a Freestyle
- * Anyone who would like to discover the joy of riding with music

Where to begin? Seminar

This fun and informative multimedia seminar gives an overview of Freestyles - the good, the bad, and dare we say, the ugly. It is an interactive presentation that engages the attendees while giving a substantial look into the process.

What you will receive?

- * If you attend the seminar and two day clinic, a discount will be given toward your completed Freestyle.
- * A 10% discount on our *Rhythm Riding* book or the practice CD
- * All participants will receive a workbook

Need something NOW?

EquiChord can get you started right away, no matter where you are. Just send us a video of you riding a test at the level you are qualified to compete, and we will take it from there.

How to continue? Clinic (one or two days)

The mounted clinic is fully customized to fit your needs - whatever they may be. Whether you are interested in simply getting you and your horse accustomed to riding with music, or are putting together a Grand Prix Freestyle, your individual ride time is designed around you. On day one, We will work on establishing average BPMs (*beats per minute*) for each gait, as well as finding the style and genre that best suits you and your horse. If you are ready to proceed on with the process, on day two, we will work on the basics of choreography. We will also video your session for further analysis. This is your chance to apply the lessons learned in the seminar.

Auditors

Auditors are welcomed to attend and will become active participants in the process.
